				Dicofol - This was a pesticide. Note there are no dicofol products registered for use as an agricultural pesticide in New Zealand. Perfluorooctanoic acid (PFOA), its salts and PFOA-related compounds has been phased out of production in many countries already. PFOA-related compounds, including side-chain fluorinated polymers, are used as surfactants and surface treatment agents (for example in textiles, paper and paints and inks). They have also been used in firefighting foams.
